Experience

Consultant Oct 2026 – Present
Netlight *Helsinki, Finland*
- Software engineering consulting

AI & Cloud Developer Jun 2026 – Sep 2026
KONE *Espoo, Finland*
- Owned end-to-end design and implementation of an AI assistant for a company-wide internal AI portal
- Designed a LangGraph orchestrator agent coordinating specialized subagents on AWS Bedrock AgentCore
- Built subagents using RAG and MCP tools to help employees find knowledge and take actions via chat
- Designed and built the chat as a full-stack Next.js and React application, streaming agent responses in real time
- Owned agent-side DevOps: CI/CD, tests, response quality evals, AWS CDK infrastructure and observability

Master's Thesis Worker Jan 2026 – May 2026
KONE *Espoo, Finland*
- Researched MCP-based tool integration for AI agents as part of a Master's thesis
- Built AI agents and supporting infrastructure on AWS Bedrock AgentCore
- Connected the agents to internal systems through MCP servers, giving them access to company tools and data

Software Engineer May 2025 – Dec 2025
KONE *Espoo, Finland*
- Led test migration from Selenium to Playwright, improving test stability and reducing test execution time
- Mapped cross-team dependencies and wrote Robot Framework tests that catch breaking changes before releases, reducing manual testing
- Designed CI/CD pipelines and supporting infrastructure with Docker and YAML to automate deployments
- Developed a Python backend for a shared test-resource booking service built on AWS Lambda and DynamoDB

Software Engineer May 2024 – Aug 2024
Danfoss Drives *Vaasa, Finland*
- Developed safety-critical temperature control firmware in C for variable frequency drives
- Wrote automated tests in Python and Robot Framework to verify temperature control logic on drive simulators
- Maintained and extended the drive simulators and built Python scripts to automate repetitive development tasks

Automation Engineer May 2022 – Aug 2023
Wärtsilä *Vaasa, Finland*
- Conducted investigations on returned automation parts from field installations
- Handled customer deliveries of engine automation software tools

Education

Aalto University Jan 2025 – Oct 2026
M.Sc. (Tech.) in Computer Science *Espoo, Finland*
- **Master's Thesis:** Design and Evaluation of the Model Context Protocol for AI Agent Tool Integration

Aalto University Sep 2021 – Jan 2025
B.Sc. (Tech.) in Automation and Robotics, Minor in Computer Science *Espoo, Finland*

National University of Singapore Aug 2023 – Dec 2023
Exchange semester *Singapore*

Technical Skills

Programming Languages: Python, TypeScript, JavaScript, C/C++, SQL, HTML/CSS
AI Engineering: Agentic AI, LLMs, MCP, A2A, AG-UI, RAG, LLM Evals
AI Platforms & Frameworks: AWS Bedrock AgentCore, Microsoft Foundry, LangGraph, Strands SDK
Cloud & DevOps: AWS, Azure, GCP, AWS CDK, Docker, CI/CD, GitHub Actions, Git, OpenTelemetry, Shell Scripting
Web Frameworks: React, Next.js, Node.js
Data Science & ML: PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib
Databases: PostgreSQL, DynamoDB

Languages

Swedish – Native **English** – Fluent **Finnish** – Fluent
